ANNEXURE -A

SPECIFICATIONS FOR 120-KVA UNINTERRUPTIBLE POWER SUPPLY SYSTEM

Quantity: 1 No

SL.	REQUIREMENT	SPECIFICATION REQUIRED	VENDOR COMPLIANCE			
NO	Make and Model	Power-One Make PMP 120/				
		Equivalent				
	Output power in KVA	120 KVA				
	Normal Active Power, KW	96 KW				
	Technology	Digitally controlled, IGBT based				
1		double conversion On-line VFI				
		according to IEC 62040-3				
		specification				
		Built-in Isolation Transformer on				
		the Inverter output				
		Input and output EMI filter				
	INPUT					
	Supply	3PH+ N+ PE				
	Input Voltage	415 V, (+10% to -15%)				
2	Frequency	50 Hz ± 5%				
	Power Factor	>0.95				
	Input current total Harmonic	Less than 5% for full load				
	Distortion					
	OUTPUT					
	Number of Phases	3Ph + N + PE				
	Output Voltage	415 V				
	Output Voltage Stability	+/- 1%				
	Output Frequency	$50 \text{ Hz} \pm 1\%$				
	Overload Capacity	125% for 10 min , 150% for 1				
		min.				
	Power Factor	0.8				
	Voltage distortion with Linear load	<1%				
	Voltage distortion with 100% Non-Linear load	<2%				
	Crest factor	3:1				
3	Overload & duration	125% for 10 min , 150% for 1				
		min.				
	Efficiency	>92%

	Auto Restart Facility	The UPS should be configured to
		automatically restart after a mains
		failure or after the batteries have
		become fully discharged
10	EPO (Emergency Power Off)	In the event of emergency UPS to
		be shut down by external
		command
	Certification	ISO 9001: 2008,ISO 14001-2004,
		ISO 18001:2007
11	PARALLEL OPERATION	The UPS supplied should be
		made parallel with the existing
		120KVA UPS having the below
		specifications:
		Output Power: 120KVA
		Model: PMP 120
		Inverter: Digitally controlled,
		IGBT based double conversion
		On-line VFI
		Make: Power-One.
		Batteries: 12V, 150AH-64 Nos.
12	CRITERIA FOR	The equipment will be accepted
	ACCEPTANCE:	based on:
		1. Test certificate from the
		vendor
		2. The equipment will be
		tested as per specifications
		at site.
13	TRAINING	01 Day
14	DELIVERY SCHEDULE	2 to 3 Weeks.
15	TESTING and	Yes, to be provided by the
	MAINTENANCE TOOLS	supplier

ANNEXURE - 01

Scope of supply for 120 KVA On-line UPS

Sl.	Description	Qty
No.		
1	Supply and Installation of 120 KVA True On-line UPS as per enclosed specification sheet in Annexure A .	1No.

Note: 1) The new UPS should be compatible for parallel operation with existing 120KVA UPS.

Specification of the existing UPS:

Output Power: 120KVA

Model: PMP 120

Inverter: Digitally controlled, IGBT based double conversion On-line VFI

Make: Power-One.

Batteries: 12V, 150AH-64 Nos.

2) Detailed specification of existing UPS is attached as per details given in Annexure-A.

3) The UPS supplier should include servicing of the existing UPS in case of any malfunctioning as a result of synchronization without any charges during the warranty period.

ANNEXURE - 02

Terms and Conditions:

- 1. The 120 KVA UPS must be compatible for making parallel operation with the existing Power One UPS, Model: PMP 120 (Rating: 120 KVA) in C-SVTC department.
- 2. All the necessary controller cards and cabling for paralleling should be included in the scope of work.
- 3. Necessary tools for basic trouble shooting of 120 KVA UPS to be provided.
- 4. Training for operation of UPS and troubleshooting to be provided at site after installation.
- 5. The UPS should be tested at the supplier's factory for specifications mentioned in Annexure 01 in presence of CMTI staff.
- 6. The vendors may visit CMTI to have a look at the existing UPS and its location for better understanding before quoting.
